Carpentry & Construction

A quick tour

Your new website

Built around your full renovation service: one team, start to finish.

What your website does for you

1

People find you

On Google, when they search for renovations, extensions, kitchens or bathrooms near them.

2

They see one team can do it all

Your full renovation service, every trade you cover, and a real review.

3

They ask for a quote

In a few taps, on a phone or a computer. It comes straight to you.

Your logo says hello

The first time someone opens the site, the two halves of your logo snap together, then the page opens up. There's a square video of it for Facebook too.

The two halves fly in

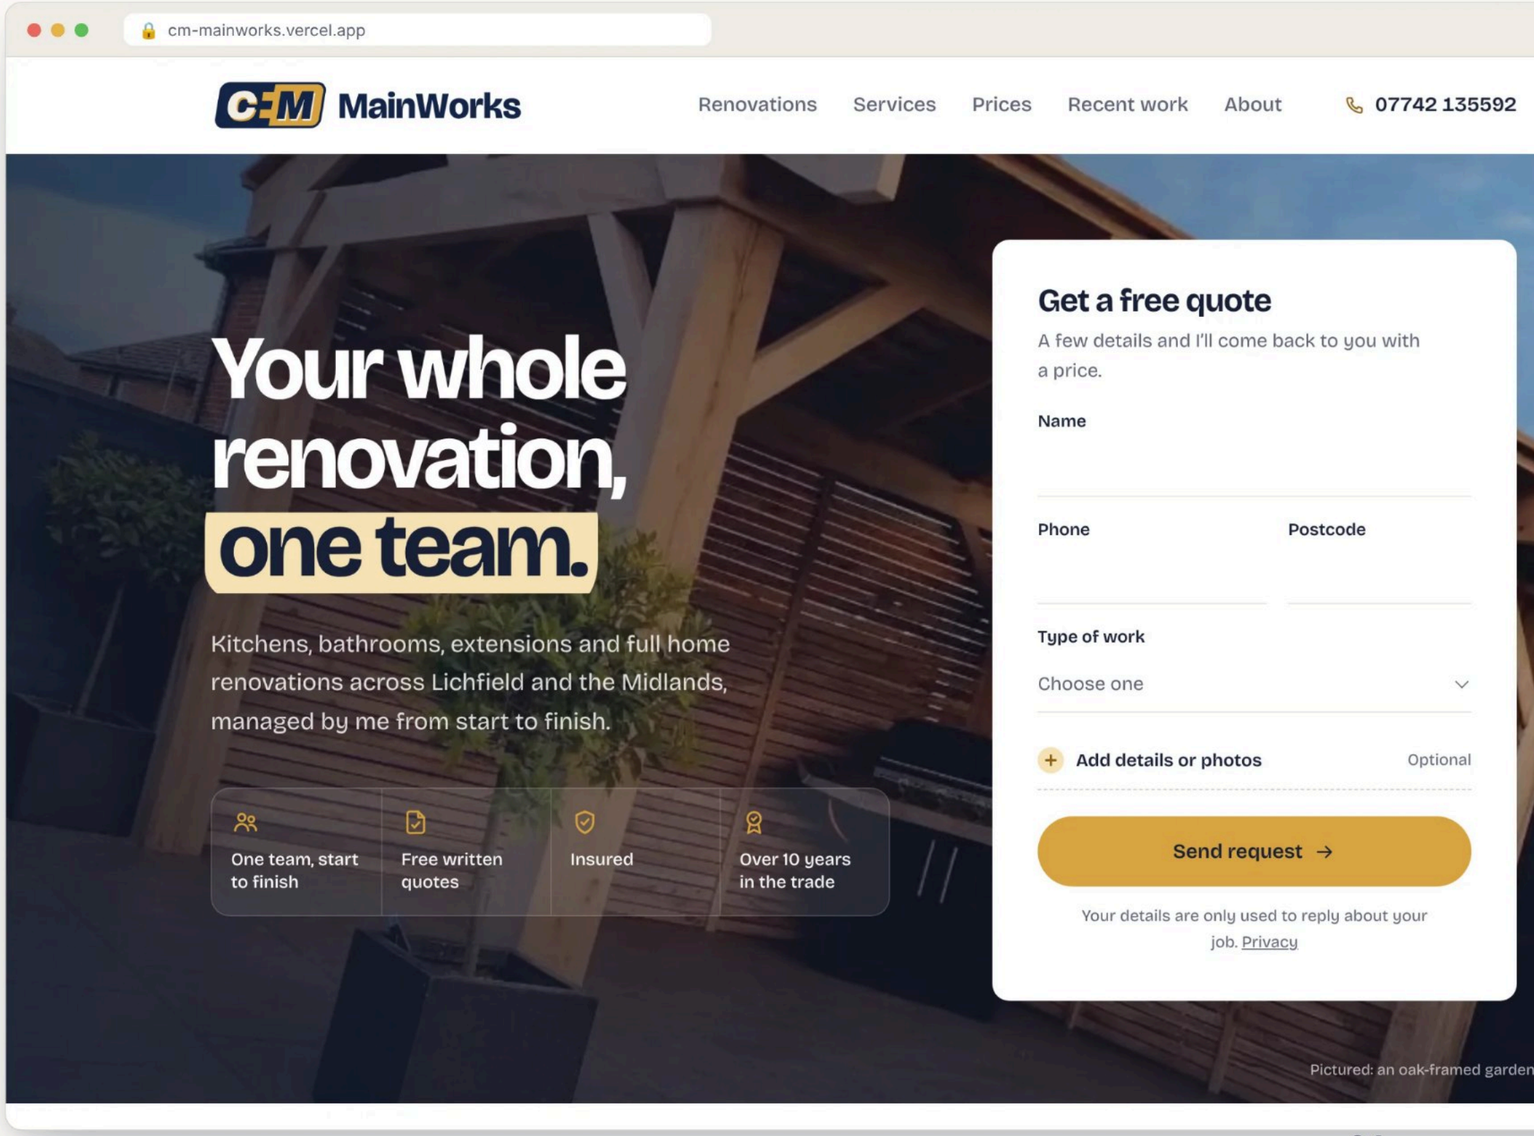

They snap together

Your name comes up

The front page

1. **Your big promise:** your whole renovation, one team
2. **Reasons to trust you** straight away: one team, free quotes, insured, over 10 years
3. **The quote form** right there, so nobody goes looking

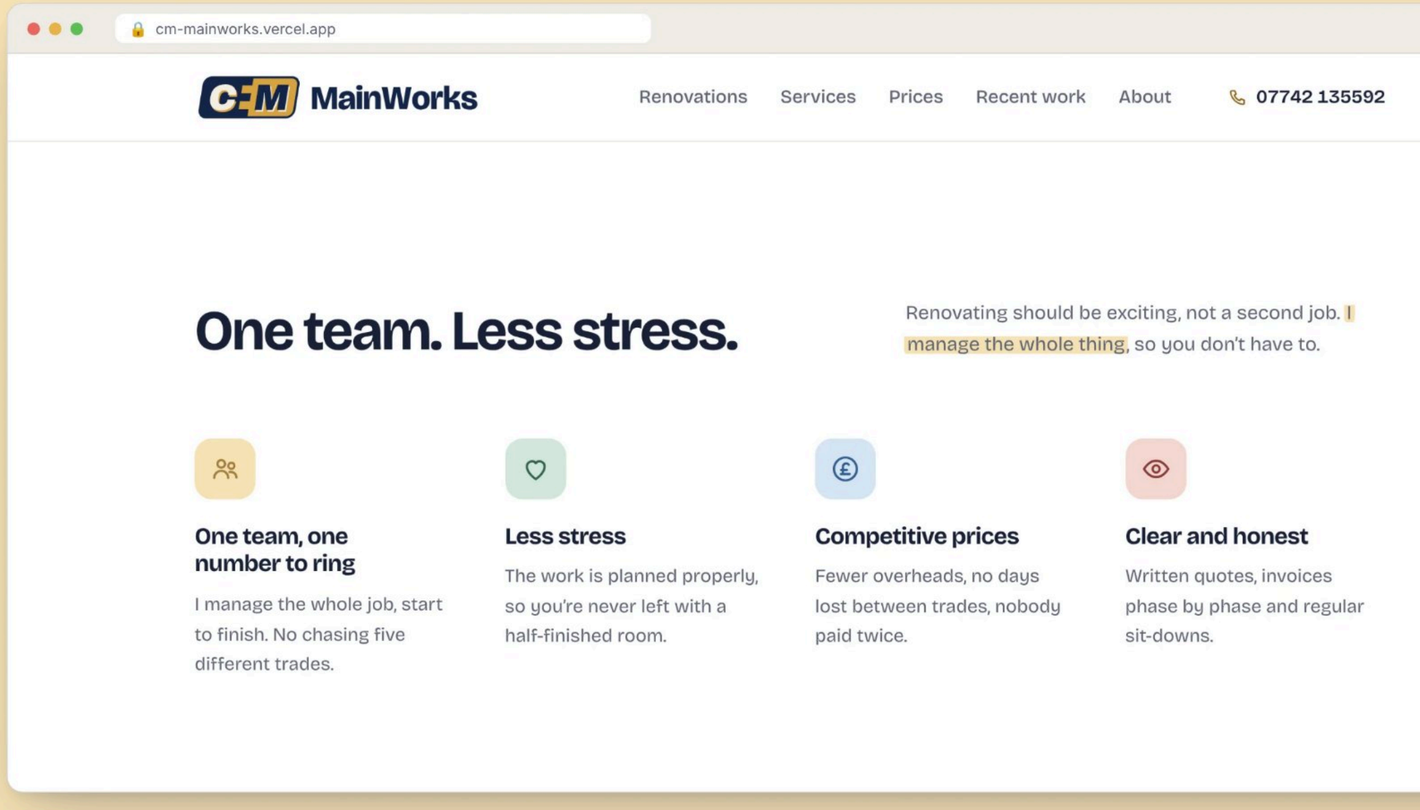

Your selling point: one team

One team, one number to ring
You manage the whole job. Nobody chases five trades.

Less stress
The work is planned, so nothing's left half done.

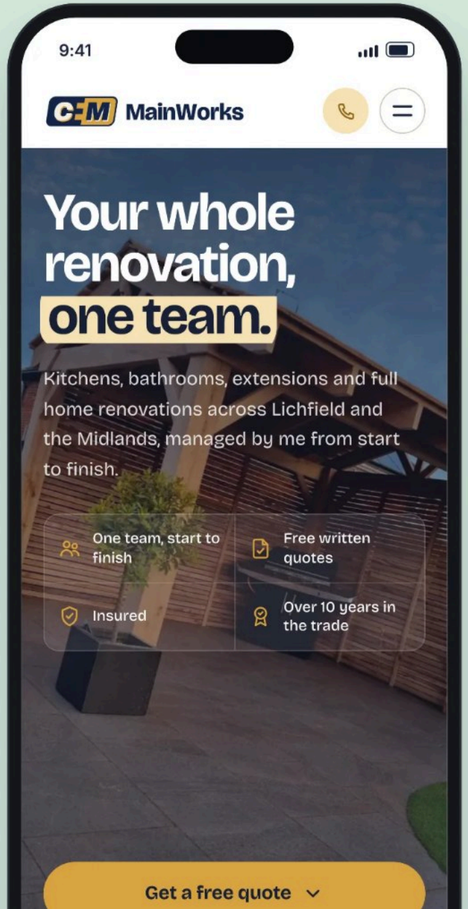

Competitive prices
Fewer overheads, and nobody paid twice.

Clear and honest
Written quotes, phased invoices, regular sit-downs.

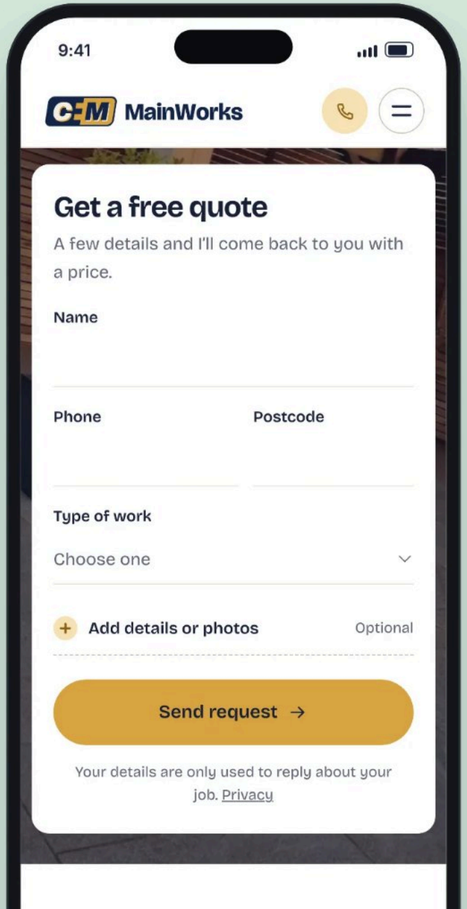

Most people will see it on their phone

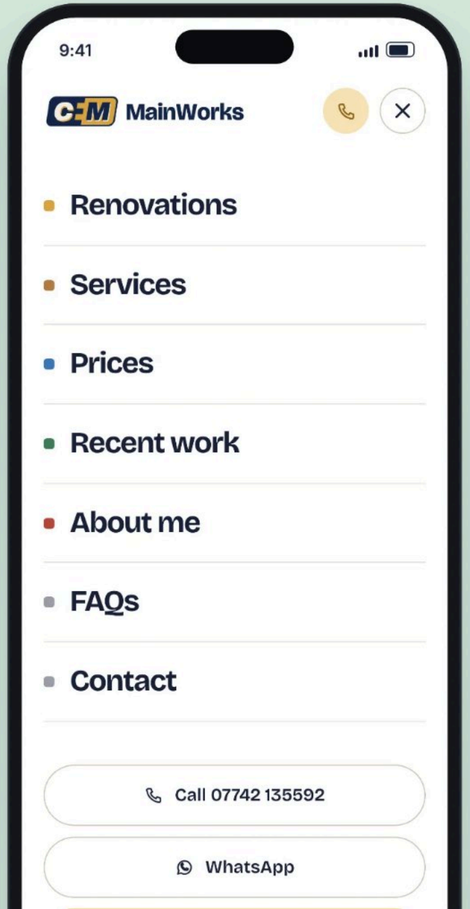

Your promise, first thing

Tap, and the form opens

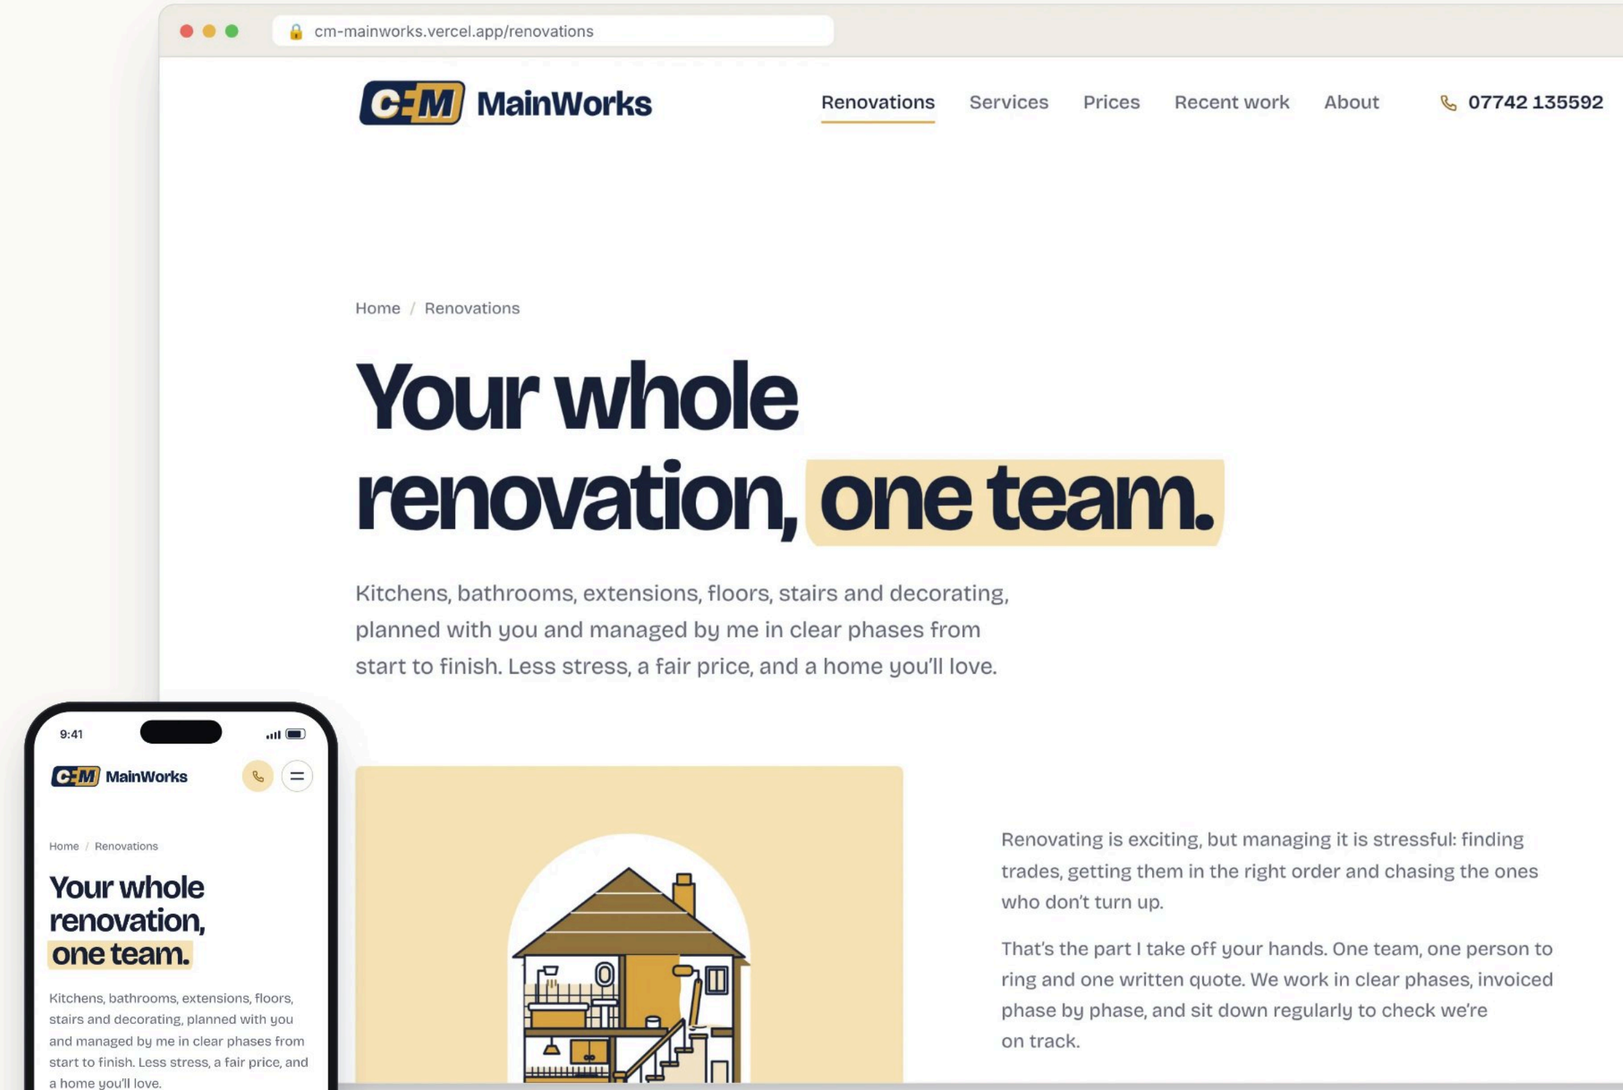

A simple menu

A page that sells full renovations

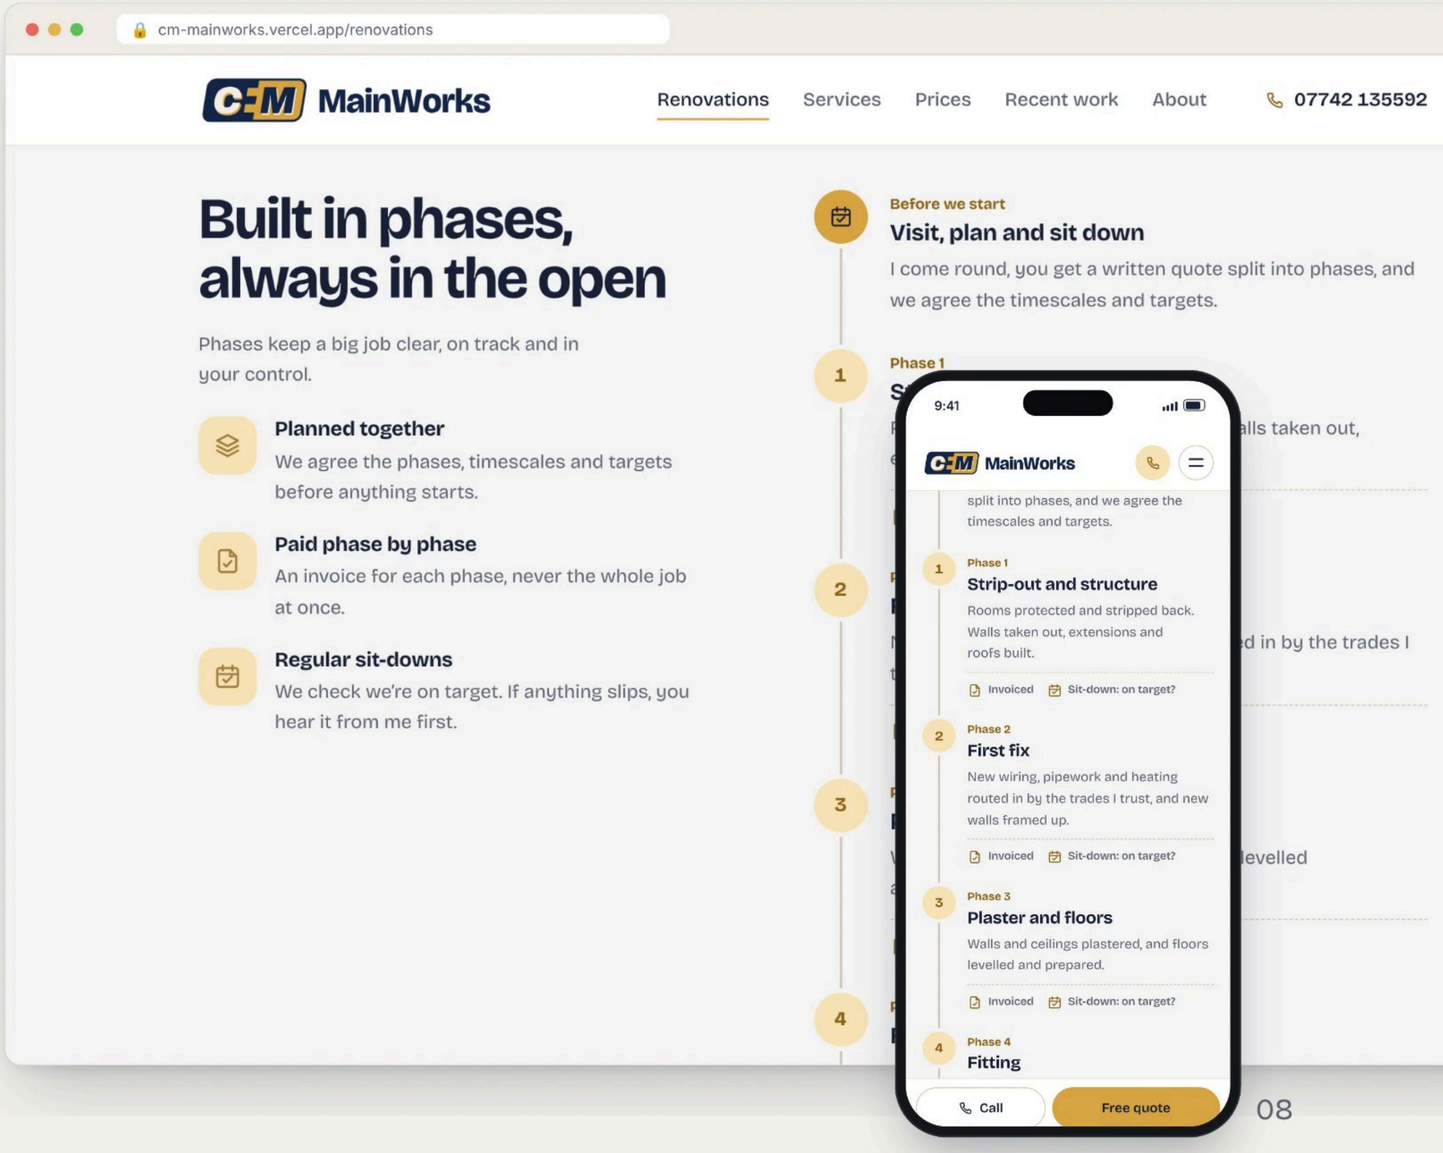

The heart of the site. It shows why using you is easier than managing a renovation yourself.

- The usual way, or your way, side by side
- Everything a renovation can include
- Prices and common questions

Built in phases, always in the open

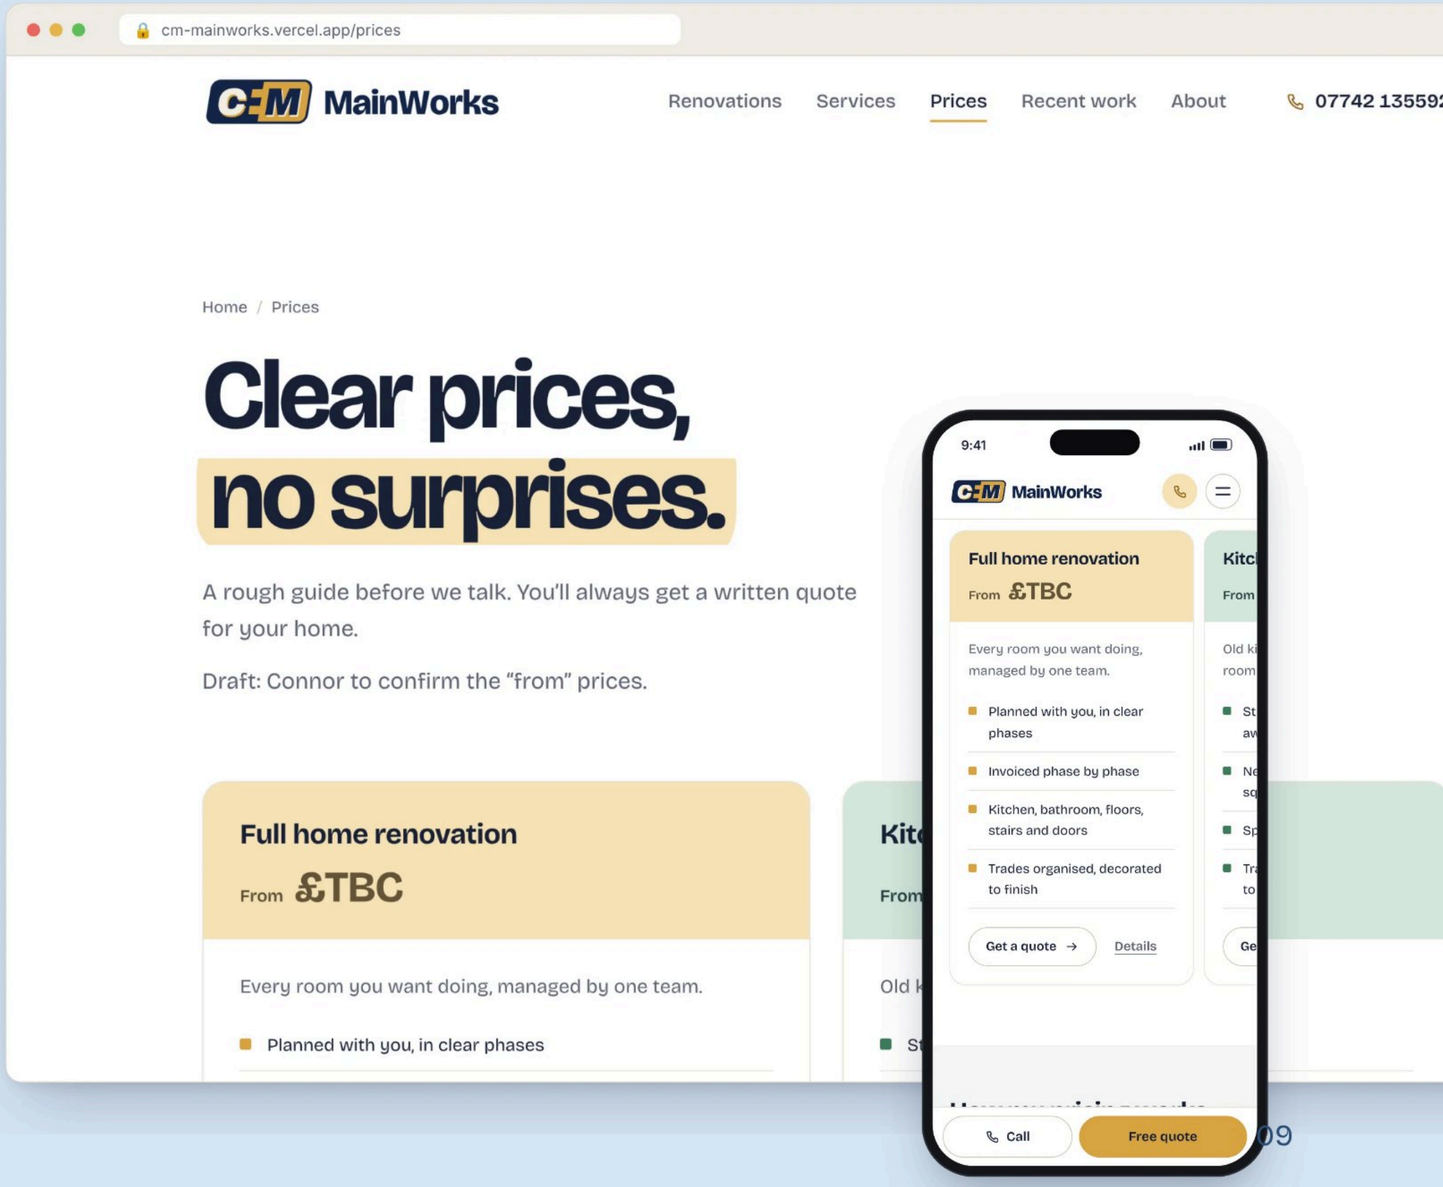

1. **Planned together.** Phases, timescales and targets agreed first
2. **Paid phase by phase.** Never the whole job at once
3. **Regular sit-downs** to check it's on target

Clear prices, no surprises

- Four renovation packages with a “from” price
- Room-by-room prices for smaller jobs
- How your pricing works, in four points

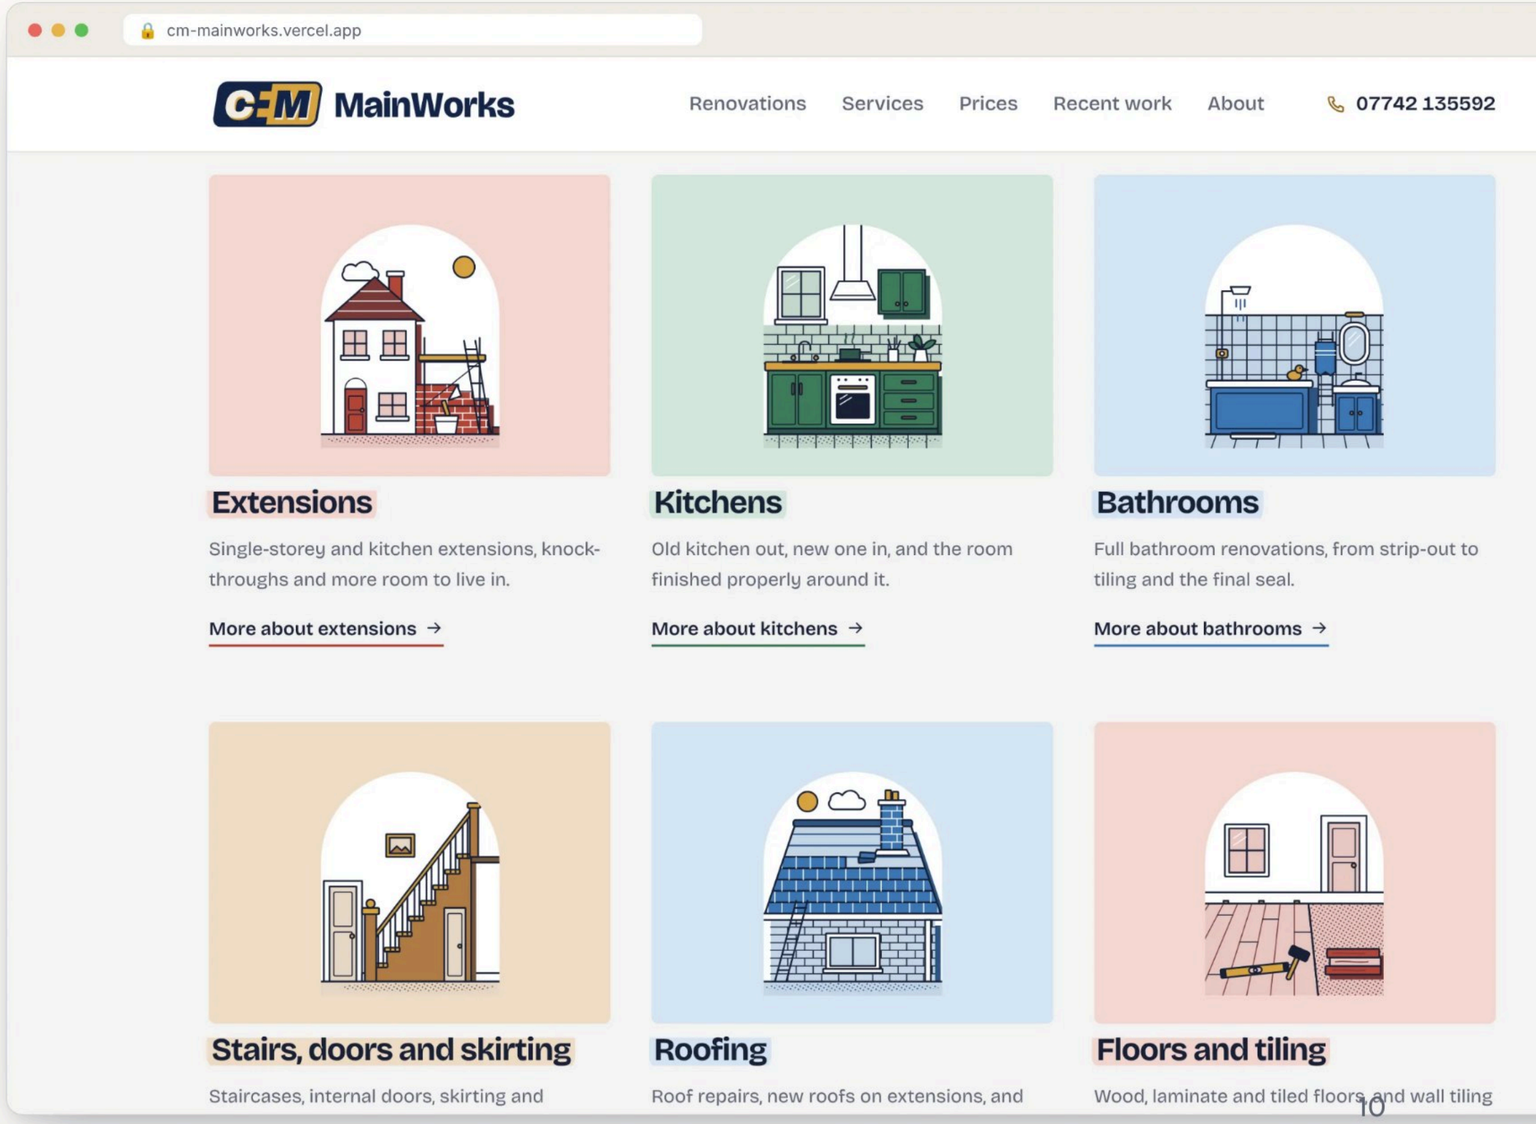

We need your “from” prices before this page goes live.

A page for every kind of job

- Extensions
- Kitchens
- Bathrooms
- Stairs, doors and skirting
- Roofing
- Floors and tiling

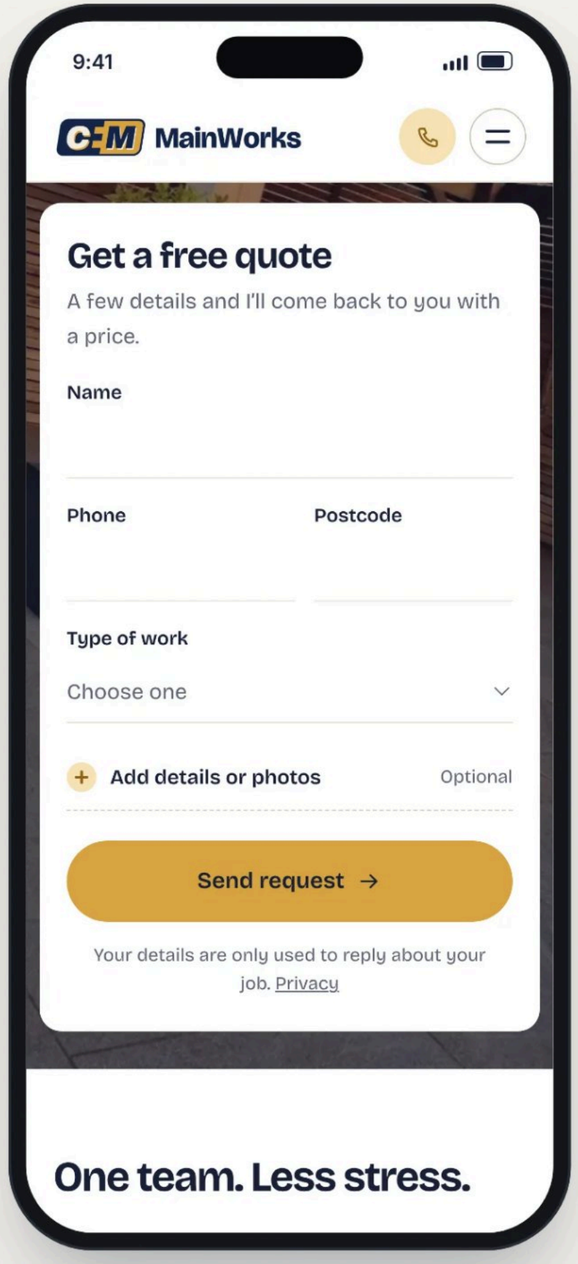

Plus smaller jobs: carpentry, joinery and decorating.

Asking for a quote takes a minute

1. They put in their name, phone number and postcode
2. They pick the job, like a full renovation or a kitchen
3. They can add a few words and photos if they want

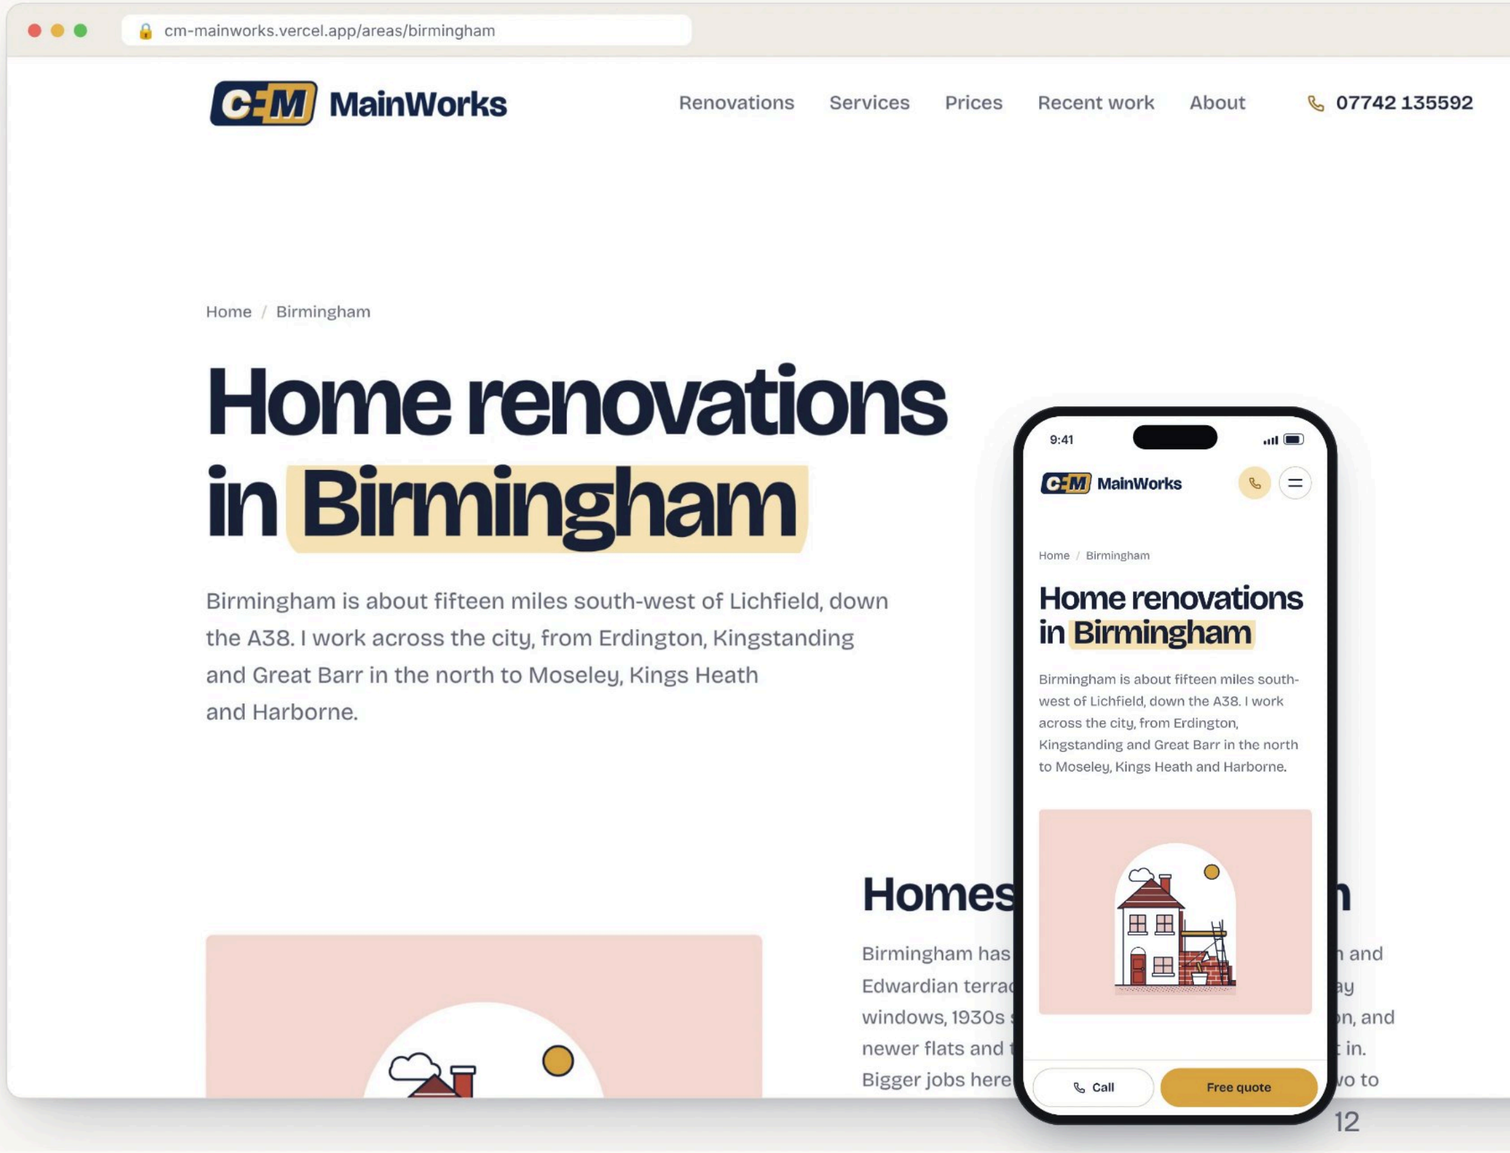

You get the request by email, photos and all, ready to ring them back.

Found on Google, in more towns

A page for every town you cover. When someone in Solihull searches for a builder or a renovation, there's a page made for them.

- Lichfield
- Shenstone
- Fradley
- Sutton Coldfield
- Cannock
- Birmingham
- Redditch
- Burntwood
- Whittington
- Tamworth
- Walsall
- Burton upon Trent
- Solihull
- Leicester

Built to be found, and fast

Everything Google looks for is built in: clear page titles, descriptions, headings, image descriptions and your business details.

33

pages for Google to find

14

town pages, Lichfield to Leicester

9

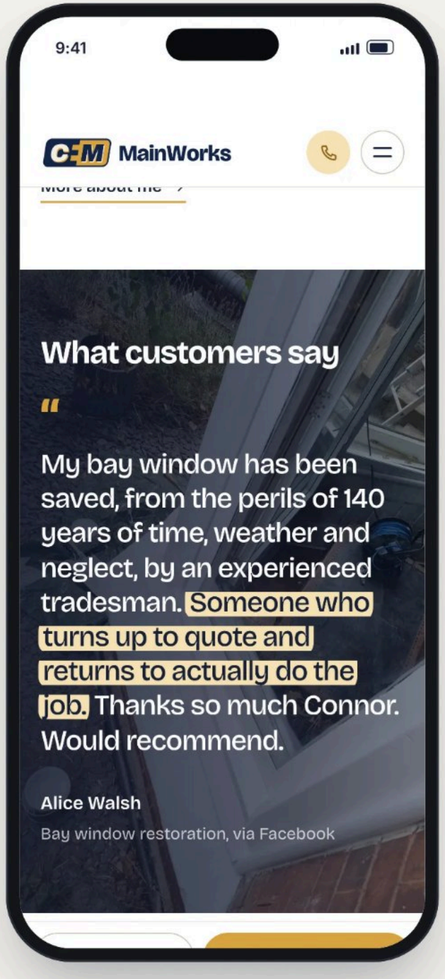

service pages, one for every kind of job

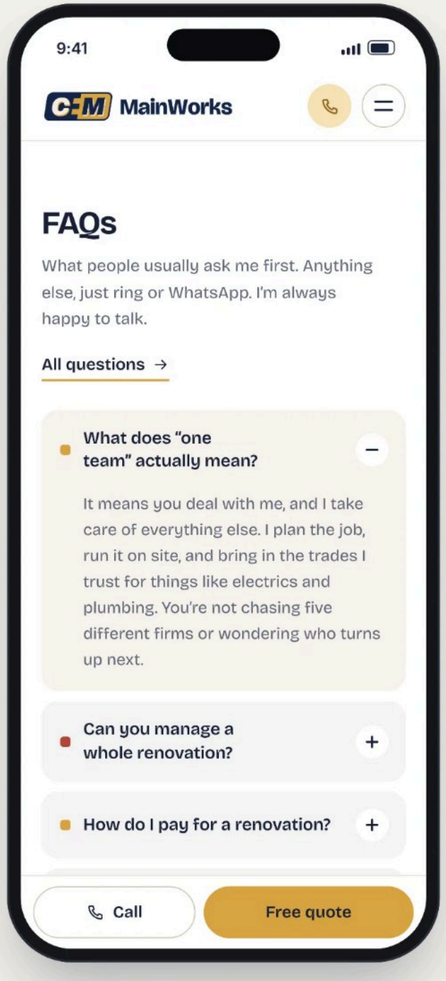

90+

Google speed score on a phone, 100 on a computer

Why people will trust you

- One team, start to finish
- Paid in phases, with regular sit-downs
- You're insured
- A real review from a happy customer
- Free written quotes

It sounds like you

“Renovating is exciting, but managing it is stressful… That’s the part I take off your hands.”

From your renovations page

Every page is written as if you’re talking: friendly, plain words, no sales talk.

What we need from you

1. **Your “from” prices**
   For each package and room-by-room job.

2. **Photos of your jobs**
   Before and afters, finished work, and one of you.

3. **A read-through**
   Check the wording, the trades you bring in and the roofing you do.

4. **Email and web address**
   So quotes come straight to you, and people can find you.
